

KWABENA OWUSU SOADWA

Software Engineer | Full-Stack Web Developer | IT Support

Accra, Ghana | +233 55 425 0225 | kwabena6037@gmail.com | github.com/Ksowusu15 | linkedin.com/in/kwabenaowusu2 | www.kwabenaowususoadwa.com

PROFESSIONAL SUMMARY

Full-stack software developer with a B.Sc. in Computer Science and hands-on experience building web applications with Python, Flask, JavaScript, TypeScript, and Next.js. Projects include a sales CRM, a car dealership platform, a crop disease detection application, and an e-commerce website with Paystack integration. Background in IT support and database administration, with experience implementing authentication, role-based access, and responsive interfaces. Completed Microsoft AI Skillfest, with an interest in AI, automation, API integration, and cloud deployment.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, HTML5, CSS3, SQL

Frameworks & Libraries: Flask, Next.js, Node.js, Prisma, REST APIs

Databases: PostgreSQL (Neon), MySQL, SQLite

Developer Tools: Git, GitHub, VS Code, Postman, JSON

Practices & Other: Responsive Web Design, API Integration, Payment Gateway Integration (Paystack), AI Fundamentals, Prompt Engineering, Technical Support

Office & IT: Microsoft Word, Excel, PowerPoint, Outlook, Windows OS, Hardware and Software Troubleshooting, Network Support

SOFTWARE PROJECTS

RebajaNow Sales Follow-Up CRM | Business Application Prototype

- Built a sales CRM prototype using Next.js, TypeScript, Prisma, and PostgreSQL (Neon) to track property visits, leads, follow-up dates, and notes.
- Implemented admin, sales manager, and sales officer roles with access controls, account management, task assignment, and responsive dashboards.

Soadwa Company Ltd Car Dealership Website | Business Project

- Developed a responsive Flask and MySQL dealership website with vehicle browsing, search, filters, details, and comparison features.
- Built an authenticated admin dashboard for vehicle listings, multiple image uploads, company settings, customer enquiries, test-drive bookings, and CSV exports.

AI-Powered Crop Disease Detection Web Application | Personal Project

- Developed a Flask-based web application that enables farmers to identify crop diseases through an intuitive image-upload interface, improving access to early disease detection.
- Implemented front-end and back-end functionality using Python, HTML, and CSS, with a modular codebase designed for maintainability and extension.

E-Millinial Store E-Commerce Web Application | Client Project

- Built a responsive e-commerce website with product browsing, interactive JavaScript cart management, and checkout through Paystack payment integration.

PROFESSIONAL EXPERIENCE

IT Officer (National Service) | *National Entrepreneurship and Innovation Programme* Oct 2024 - Aug 2025

- Resolved hundreds of hardware, software, and network support requests with minimal escalation.
- Installed, configured, and maintained computer systems and business applications, ensuring consistent uptime for day-to-day operations.
- Assisted in developing and testing internal software solutions, contributing to functional requirements and bug identification.
- Maintained IT assets and organizational databases, supporting accurate record-keeping across departments.

IT Officer | *Bie Print Media Solutions & Business Consult* Oct 2021 - Aug 2022

- Managed and maintained the company website, ensuring content accuracy and consistent uptime.
- Developed and maintained organizational databases to support business operations and reporting.
- Designed digital marketing materials and resolved hardware/software issues, improving day-to-day operational efficiency.

VOLUNTEER EXPERIENCE

IT & Social Media Lead | *Sebaid Foundation* Nov 2024 - Present

- Developed the organization's website and continue to maintain it, ensuring reliability and up-to-date content.
- Manage digital campaigns and create promotional graphics, growing engagement across social platforms by 60%.
- Monitor analytics to identify engagement trends and inform content strategy.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science | *Kwame Nkrumah University of Science and Technology*
2020 – 2024
